Unexpected intruders? Do you have unwanted pests and odors sneaking into your facility?

Now that the flu and cold season will soon be upon us... Keep your facility clean, safe and smelling fresh! Take advantage of our fall **KennelSol®** products Promotion!

**KennelSol APS®** new chlorine dioxide air purification technology safely and reliably releases controlled amounts of chlorine dioxide gas for amazing odor control and sanitation. Chlorine dioxide gas actively destroys and absorbs airborne odors rather than masking scents with fragrances. Numerous scientific studies have shown it to have demonstrated efficacy against viruses and bacteria in the air that surface disinfectants cannot control. Request a copy of The Journal of Virology study "Protective effect of low-concentration chlorine dioxide gas against Influenza A virus infection."

...And don't forget  
**KennelSol**

**KennelSol**, our popular and well recognized quarternary disinfectant, knocks out pathogens in one easy labor saving step. PH neutrality and an abundance of solvent free surfactants makes KennelSol an extraordinary cleaner with the safest formulation for use around animals and humans. It maintains EPA approval for efficacy against the most animal pathogens of concern including Canine Parvovirus, Bordetella and Influenza virus on surfaces. Protect your investment with its non-corrosive and non-staining formulation. **KennelSol** leaves behind its popular fresh and clean scent. If you have always wanted to try **KennelSol...** NOW is the time!

Use **KennelSol APS** with **KennelSol** surface disinfectants and elevate your sanitation standards to a new level of safety.
