

SANITATION PROGRAM ASSESSMENT TOOL

Use our assessment tool to see how your facility ranks

Ranking	Must Haves in Your Cleaning System	Recommended Sanitation Program Products
BASIC  Recommended for a basic sanitation program	Big D's of your facility:	
	HSD-Hard Surface Disinfectant / Cleaners	KennelSol for cleaning and disinfecting
	Degreasers	Orange Citrus Degreaser for heavy duty cleaning
	Deodorizers	OdorPet and PX550 for cleaning pet messes and for pet odor and urine elimination
	Drain Maintenance	BioDrain for drain maintenance
INTERMEDIATE  To take your sanitation program to the next level, add the following items	"Big Gun" for disease outbreaks / control - It's the nuclear bomb for control when needed	
	HLD/S - Higher level disinfection / sterilizer	Stericide, Trifectant, Purell Healthcare Surface Disinfectant
ENHANCED  To take your sanitation program to the next level, add the following items	Air, Hand and Cleaning Aids	
	Air Purification	KennelSol APS a chlorine dioxide treatment of air handlers and facility air
	Touchless Hand Sanitizers	Purell Hand Sanitizers and ultraviolet light
	Microfiber cleaning products color coded for areas of use (RED for isolation areas, BLUE for general cleaning, etc.)	Microfiber Mops & Cloths
PROFESSIONAL  To take your sanitation program to the next level, add the following items	Surface Saturation & Green...	
	Electrostatic Sprayers - This is a spray technology that electrostatically charges particles so that they go around surfaces that are not in the direct line of the spray for better overall surface saturation of the entire surface (all sides) of areas being treated – areas often overlooked because they are hard to get at, etc.	Protexus Electrostatic Spray Applicators
	Aqueous Ozone - This is ozonated water – it's 50% more powerful than bleach and kills micro-organisms 300 times faster – and it breaks down into nothing more than water and oxygen – that's about as safe as you can ask for.	Hygiea handheld liquid Ozone Sprayer, SAO Dispenser (Lotus PRO Aqueous Ozone)
VETERINARY / HOSPITAL GRADE  To take your sanitation program to the next level, add the following items	High Tech	
	Low Pressure Low Flow - LP Applicators These spray applicators do not aerosolize particles and microbes like seen with high pressure sprayers / pressure washers. In other words, you don't want to spread microbes by blasting them into the air.	LPLFs like these
	Industrial Washer and Dryer - These last much longer, so you buy machines less frequently – 15 year, 40-hour per week duty cycles, etc.	ENCORE washers and dryers
	ATP Testing for Organic Debre - This tells you how clean your surfaces are, and how well your staff is doing at their job. Cleaning is 90% of the battle of disease control.	Hygiene ATP Testing, Karcher Floor Scrubbers, Karcher Armada Turf Grass Scrubber

Alpha Tech Pet is proud to be your expert in establishing a sanitation program tailored specifically for your needs; a program that's environmentally sensitive, superior in its efficacy, and maintains the highest standards of safety for animals under your care and for your employees.
